Description

We are seeking a Retail IT Solutions Developer to transform customer experiences and streamline retail operations. You will design and implement innovative e-commerce platforms and point-of-sale systems tailored to the needs of the retail industry.

Responsibilities

- Develop and deploy e-commerce platforms and point-of-sale systems.
- Enhance user experience through innovative technology solutions.
- Collaborate with retail teams to identify and address technology needs.
- Ensure system integration and compatibility with existing retail operations.
- Monitor and optimize system performance for maximum efficiency.

Qualifications

- Bachelor’s degree in Computer Science, Information Technology, or related field.
- Experience with e-commerce platforms and point-of-sale systems.
- Strong understanding of retail operations and customer experience enhancements.
- Proficiency in programming languages and development frameworks.
- Excellent project management and problem-solving skills.
- Experience with specific retail technology solutions (e.g., Shopify, Square).
